Subject: FW: biomarker information

Dear Raymond,

this is the spreadsheet information on biomarkers.

Regards,
Jan

Subject: biomarker information

Dear Jill--

I have attached a spreadsheet summarizing information regarding analytical methodology, smoke and biofluid concentrations, and half-life data for the biomarkers of exposure. We certainly view this as a dynamic document, and welcome any updated information any of your colleagues may have located on these compounds. Please note that I often have written the complete reference only the first time that a citation appears. I've tried to weed out ambiguous abbreviations, but let me know if any escaped our proofreading. Would you please forward this to the appropriate Covance personnel? Thanks!

I look forward to our work together in 2001. Happy Holidays!
